SUMMARY

Full-stack engineer (M.Sc. Computer Systems) with 3+ years shipping production platforms: a fintech super-app and a food-delivery app both live on the App Store and Google Play, a claims-management SaaS, and an exam-prep platform I built and operate. Laravel and Django REST backends, React/Next.js frontends, PostgreSQL, and LLM integrations into real user-facing features. Open-source contributor to React (merged PR reviewed by a core maintainer). Arabic (native), French (B2), English (B2, daily technical use).

EXPERIENCE

Software Engineer — BEDEL SARL • Nouakchott

Jun 2026 – Present

Bedel — fintech super-app for Mauritania (iOS/Android): payments, recharge and gift cards, 30+ digital services. bedel.mr

- Design and implement Laravel + PostgreSQL backends exposing REST APIs consumed by React, Next.js, TanStack Start and React Native clients.
- Built LLM-backed features (OpenAI-compatible APIs) for the in-app AI assistant with Arabic and French support, and for workflow automation and customer support.
- Phone-number + OTP authentication and secure payment flows via local wallets (Bankily).

Software Engineer — SMART MS SA • Nouakchott

Oct 2023 – Jun 2026

- **Sha6er** — food-delivery platform (iOS/Android, 4.6★): customer ordering and real-time order tracking with courier map, wallet payments (Bankily, Masrvi, Sedad), restaurateur order and analytics dashboard.
- **Smart Claim** — claims-management SaaS: customizable claim forms, role-based access (admin, agent, collaborator, claimant), real-time notifications, public/private comment threads.
- Designed database schemas and optimized reporting SQL on PostgreSQL; built operational dashboards for decision support.
- Integrated AI features (document processing, verification, conversational assistant) into internal business tools.
- Earlier (Oct 2023 – Feb 2024): led WordPress delivery for client sites, including Three.js interactive experiences and SEO/performance work.

Full-Stack Developer (part-time, remote) — XpVision • Germany

Sep 2024 – Dec 2024

- Delivered Next.js features and Strapi REST APIs for an enterprise SaaS product, working asynchronously in English with a distributed European team.

Front-End Developer (part-time, remote) — Moulhim • Saudi Arabia

Jun 2024 – Aug 2024

- Built React interfaces with Supabase auth/data for a hotel-management system and company site for an Arabic-speaking client.

Full-Stack Developer — Yata Medical • Nouakchott

May 2023 – Oct 2023

- Teleconsultation platform connecting patients and doctors: Twilio video consultations, React frontend, Spring Boot services, authentication/authorization and reporting queries.

Full-Stack Developer (internship, remote) — Promesse

Feb 2023 – Jul 2023

- REST APIs, reusable components, Agile delivery.

PRODUCTS I BUILT OR WORKED ON (ALL LIVE)

- **Tahdir** — exam-prep platform for Mauritanian civil-service competitions that I built and operate: 152 specializations, 60-question timed mock exams, three difficulty levels, per-question corrections and statistics, adaptive learning paths, online payment; Arabic/French UI. Also offered inside the Bedel app. tahdir.digiwave-tech.com
- **Bedel** — fintech super-app (BEDEL SARL). bedel.mr • [App Store](https://appstore.apple.com/app/bedel) • [Google Play](https://play.google.com/store/apps/details?id=com.bedel.mr)
- **Sha6er** — food-delivery app (SMART MS SA). [App Store](https://appstore.apple.com/app/sha6er) • [Google Play](https://play.google.com/store/apps/details?id=com.sha6er)
- **Smart Claim** — claims-management SaaS (SMART MS SA). smartmssa.com/smart-claim-2-2
- **AB Group Gift Cards** — digital gift-card platform (freelance): React/Next.js + Supabase, Arabic/English, authentication and payment flows. abgroupgiftcards.com

- **@sidiyel/wysiwyg** — open-source Tiptap-based React editor on npm (configurable toolbar, CSS-variable theming, CI). github.com/SidiEvel/wysiwyg

OPEN SOURCE

- **React (facebook/react)** — test fix in the Fizz server renderer merged by core maintainer Sebastian Silbermann ([PR #37213](#), Sept 2026). Three further fixes open under review, each with a failing-first regression test: a Scheduler crash after jsdom teardown ([#37115](#)), a Fizz streaming hang where an outlined Suspense boundary's abandoned fallback blocked its parent ([#37181](#)), and missing onToggle listeners on hydrated <dialog> ([#37262](#)).
- **VulnClaw** (AI pentest CLI, 2.7k★) — diagnosed and fixed a cross-platform test failure (POSIX vs Windows cmd quoting); merged by the project owner ([PR #221](#)).
- Reproduced and disproved a reported React Flight bug, leading its reporter (author of Waku/Zustand) to close it ([#37116](#)).

SKILLS

Backend: Laravel/PHP, Node.js, Python (Django REST), Spring Boot, Strapi, REST API design, auth/authorization

Frontend: React, Next.js (SSR/ISR), TypeScript, TanStack Start, React Native, Tailwind CSS

Data: PostgreSQL (schema design, query optimization), MySQL, MongoDB, Supabase

AI: LLM/OpenAI-compatible API integration, document processing, workflow automation

Practices: Git/GitHub PR workflow, CI, regression tests, code review, Agile

EDUCATION

M.Sc. Computer Systems — Faculté des Sciences et Techniques, Nouakchott · 2021–2023

B.Sc. Mathematics & Computer Science — Faculté des Sciences et Techniques, Nouakchott · 2018–2021
